

Ebi Rejali

Senior Java Developer · Technical Lead

hello@rejali.de · Berlin, Germany

rejali.de · linkedin.com/in/ebirejali · github.com/ebirejali

PROFILE

Senior Java Developer & Technical Lead with **12+ years** of experience building mission-critical backend systems. Holds technical leadership for the project at SMS GmbH — deciding on architecture and technical direction — and mentors and manages across different teams. Work spans complex, high-traffic domains: real-time data platforms, industrial IoT, and large-scale transportation systems.

PROFESSIONAL EXPERIENCE

Senior Java Developer & Technical Lead

SMS GmbH · Dresden / Berlin (remote) · Jan 2019 – Present

Stack: Java 17/21, Spring Boot 3.x, DDD, Kafka, Kubernetes/AKS, PostgreSQL, Redis, Azure, TDD

- Designed distributed microservice architectures using **Spring Boot 3.x**, **DDD**, and Clean Architecture, powering platforms with 10,000+ daily users
- Owned CI/CD pipelines end-to-end across Jenkins, Docker, and **Kubernetes** on Azure (AKS)
- Reduced system latency significantly through JVM profiling
- Introduced engineering practices that stuck across the team: TDD, SonarQube, Testcontainers, structured code reviews
- Since 2024: holds technical leadership for the project, deciding on architecture and technical direction (not a people-management title); mentors and manages across different teams; at different stages, contributed to DevOps, mobile app, and frontend work

Senior Java Engineer

Hooshmand Sazan · Nov 2014 – Jan 2019

Stack: Java 8, Spring Boot, Microservices

- Moved from writing code to designing systems, growing into a role focused on why architectural design matters more than the code itself
- Completed an **M.Sc. in Artificial Intelligence** in parallel (University of Isfahan) — neural networks, machine learning, NLP, probabilistic reasoning
- Declined a fully-funded PhD scholarship (full tuition and living costs) to stay focused on building production systems

Junior Web Developer

Apadana Company · Jan 2012 – Jan 2013

- Built four enterprise web platforms almost from scratch: role-based access control systems, booking engines, real-time communication modules

SKILLS

Languages	Java 17/21
Frameworks	Spring Boot 3 · DDD · Clean Architecture · TDD
Messaging	Kafka
Data	PostgreSQL · Redis
Infra / Cloud	Kubernetes · Azure

EDUCATION

M.Sc. Artificial Intelligence

University of Isfahan · 2013 – 2016

B.Eng. Software Engineering

Sepahan University · 2011 – 2013

Associate Degree, Software Engineering

Mohajer University · 2009 – 2011

Computer Science Diploma

Mohammad Bagher High School · 2007 – 2009

LANGUAGES

Persian / Farsi — Native

English — C1

German — B2

SIDE PROJECTS

Independent, self-shipped work outside the day job — iOS apps on the App Store: Split Bills with Roommate, Stadtrundfahrt, Berlin Heute, Steuerbelege ordnen, Shift Plan Reminder. Websites: perserwich.de (ordering site for a Persian fast-food restaurant, two Berlin locations).
